Wheelie Bins

Why

Wheelie bins are the preferred container for storing office and mixed papers and are available in a range of sizes to cater for your office and/or factory recycling needs.

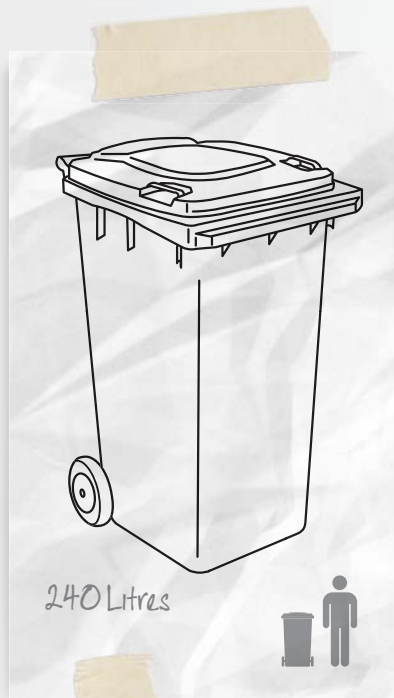

They are made of reinforced plastic and are clean and tidy and are easily manoeuvred within an office or around a factory floor. They come standard with lids and wheels and therefore contain the contents of the bins effectively and efficiently.

Wheelie bins are emptied with a rear loading truck that requires minimal head room when emptying, compared to steel cages. Wheelie bins are often the preferred solution in basements or garages that typically have low ceiling heights.

Wheelie bins are available in a variety of sizes from 240, 660 and 1100 litre containers.

What

- Mixed paper
- Plastic film
- Office paper
- Cardboard
- Printers offcuts

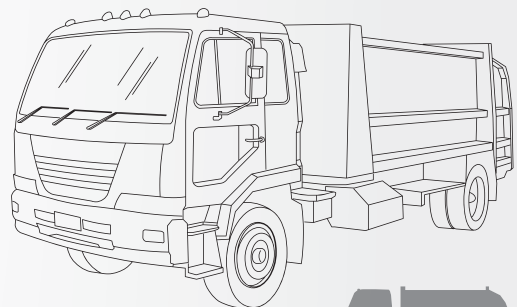

240 Litres

660 Litres

1100 Litres

Please remember: contamination of film and cardboard from food, oils and soils cannot be accepted because they cause major issues when recycling. If in doubt leave it out.
